

User Guide for the Cloud for “Global Research for COVID-19”

1. Menus and Functions:

There are two menus: Tools and Files

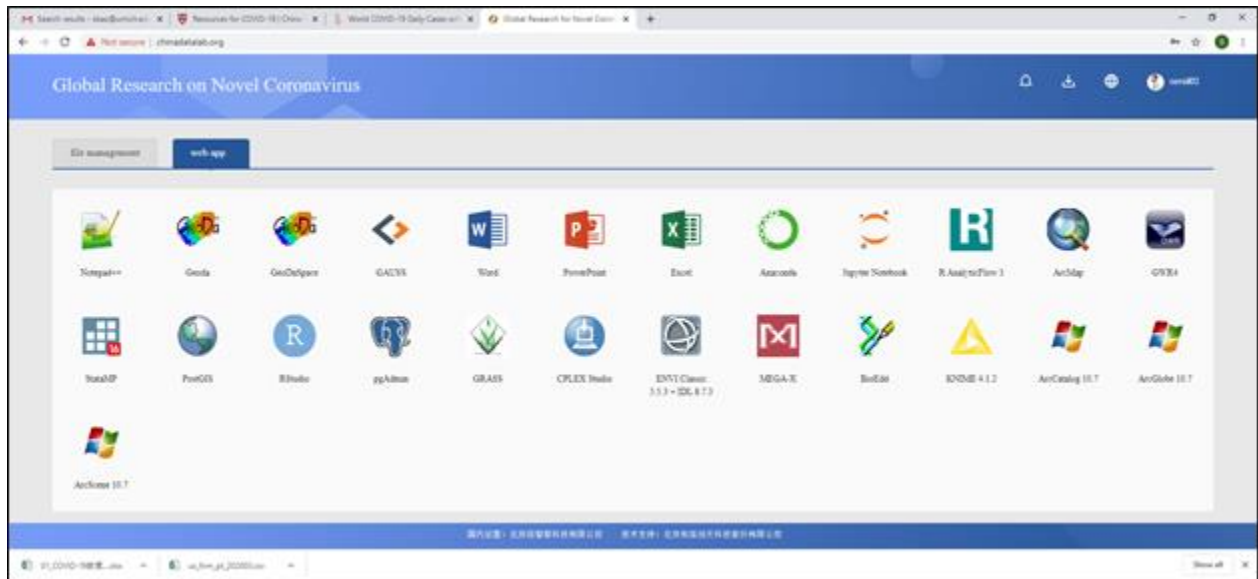

Tools includes a list of tools for data analysis

Files includes three folders: Public, Personal, and Download

Public folder is for publically shared files. Users cannot edit or save any files under the public folder. Users can find a list of all data and workflows available on the cloud under the public folder.

Personal folder is for personal files, Users can copy, upload, write or edit files under Personal folder

Download folder is for those files users would like to download files to local PCs. All files, except for PDF and images files, need to be approved before they can be downloadable.

2. Regulations on data and tools

- The users should not transfer the account (user id and password) to others without approval by the host.
- The users should not download the shared data from the public folder to personal PCs in anyway without approval by the host.
- The users should not upload any sensitive information to the Personal folder on the server and share with others. The user should take all responsibilities for possible damages of legal issues if violate the rule.
- The tools on the server are for academic research or training only. The users should not use those tools on the server for any commercial uses.
